CREAGRAVEL 20

Strong and flexible gravel grids in HDPE

For a functional and stable gravel surface, that is perfectly water-permeable.

Info

- ✓ Frost-resistant gravel grid **in HDPE** with high compressive strength and impact value
- ✓ Increased resistance against torsional loads due to **plastic reinforcements** between cells
- ✓ Polyester geotextile: very strong, does not rot and thanks to open structure there is no chance of silting up
- ✓ Foldable sheets make for easy transportation, with large dimensions **allowing fast installation**
- ✓ ECCOgravel creates a stable surface for walking and cycling

Specifications

- ✓ **DIMENSIONS:** sheet 80 x 120 cm
- ✓ **HEIGHT:** sheet 2 cm
- ✓ **MATERIAL:** honeycomb 100% HDPE - high-density polyethylene
- ✓ **COLOUR:** white

Applications

- ✓ Garden and foot paths
- ✓ Terraces and patio spaces
