 30 mm

## CREAGRAVEL 30

Strong and flexible gravel grids in HDPE

For a functional and stable gravel surface, that is perfectly water-permeable.

### Info

- ✓ Frost-resistant gravel grid in HDPE with high compressive strength and impact value
- ✓ Increased resistance against torsional loads due to plastic reinforcements between cells
- ✓ Polyester geotextile: very strong, does not rot and thanks to open structure there is no chance of silting up
- ✓ Easy transportation, with large dimensions allowing fast installation
- ✓ ECCOgravel creates a stable surface for walking, cycling and driving

### Specifications

- ✓ **DIMENSIONS:** sheet 80 x 120 cm
- ✓ **HEIGHT:** sheet 3 cm
- ✓ **MATERIAL:** honeycomb 100% HDPE - high-density polyethylene
- ✓ **COLOUR:** White

### Applications

- ✓ Driveways and parking areas en parkings
- ✓ Fire Roads
- ✓ Garden and foot paths
- ✓ Terraces and patio spaces
